

Guideline for the preparation of the ‘expert report on the doctoral dissertation project’ for applications for an a.r.t.e.s. Doctoral Scholarship

The expert report is to be written by a professor who is entitled to supervise doctoral dissertations at his/her home university.

The expert report should comment on the dissertation project regarding the following issues:

- Professional expertise and potential of the candidate (based on his/her careerpath, academic achievements and, if applicable, the final thesis)
- Evaluation of the level of preparation, feasibility and plausibility of the proposed project
- Significance of the dissertation project for the current research in the respective discipline and field of expertise
- Please give an overall assessment of the application (strong support: 8–10 points; support: 5–7 points; no support: 0 points)

The expert report can be submitted either together with the additional application documents by the candidate or separately via e-mail to:
